

ABZAR TUNNEL JAHAN – 237 CONCRETE SPRAYING MACHINE

The small and reliable one

Compact and safe

The very compact ATJ-237 concrete spraying machine allows for quick and safe funneling of dry bag material due to its low hopper height.

Ideal for dry concrete spraying

Specially designed for processing dry mix material with small output (Up to 4m³/h). The ATJ-237 provides outstanding and long lasting quality.

Occasionally wet mortar or concrete spraying is also possible.

ATJ-237

Concrete spraying machine

Compact, secure and reliable: the smallest concrete spraying machine within the Abzar Tunnel Jahan portfolio, available as standard. It is specially designed to process dry mix and can also occasionally be used for small wet shotcrete applications of mortar. Due to its low hopper height you can funnel dry sack material gently and quickly.

Advantages and benefits

- Theoretical output from 0.2 up to 4 m³/h.
- Easily overcome obstacles of long or high conveying distances.
- Reduced rebound
- Ideal for all small mortar or concrete refurbishments.
- Compact and secure design.
- Automatic lubrication system.

Technical data

Machine type/ variants	Standard/Top
Drive	Electromotor(2.2KW)
Operating voltage/air consumption	380-480v(50/60Hz)
Rotor sizes in litres	1.3, 3.6, 5
Theoretical output in m ³ /h(Top)	(0.15-0.8),(0.45-2.2),(0.6-3)
Max grain sizes in mm	(4,4-6,8)
Max conveying distance in m(horizontal/vertical)	Dry:200/100
Weight in Kg	~ 400
Dimensions in mm(length,height, width)	1230, 1130,720
